PROFILE

After seven years in restaurants, the last two leading a kitchen team, I moved into IT. I'm now in the Computing Support program at Pearson, working hands-on with Windows Server, Active Directory, networking, and virtualization in VMware and Hyper-V. Outside class I manage my own VPS-hosted servers. I'm looking for an internship where I can support users, troubleshoot systems and keep learning.

FEATURED PROJECT

2024 – Present

Private MMO Game Server

Developer & Server Administrator · Independent project

Live with paying players | ~CAD $300–400/month | OVH · Host4Fun · SQL

- Built and still run the server, from first setup to daily operation
- Set up and maintain VPS hosting on OVH and Host4Fun, mostly through remote access
- Write SQL updates for player accounts, game data and new content
- Track down lag, crashes and config problems before players notice
- Log uptime and server health in Excel and Notion

EXPERIENCE

Windows Server & VMware Lab

2025 – Present

Pearson Electrotechnology Centre, Montréal

- Create and manage VMs in VMware Workstation and Hyper-V
- Set up Windows Server with Active Directory, DNS and DHCP
- Build domain environments and virtual networks from scratch

Kitchen Manager / Supervisor

2023 – Present

Parma Café, Montréal

- Fix POS, printer and network issues on the spot so service never stops at rush hour
- Keep records, reports and documentation up to date in Microsoft Office
- Train new staff and run the kitchen team day to day

Where I first became the go-to person for anything tech

EDUCATION

DEP — Computing Support

2025 – Present

Pearson Electrotechnology Centre, Montréal
